

The 2024 NTU-AS Symposium on Macroeconomics and Resilience

May 28, 2024

Department of Economics, National Taiwan University

We are pleased to announce that the 2024 NTU-AS International Symposium on Macroeconomics will be held at the Department of Economics, National Taiwan University on May 28, 2024.

We expect to bring together domestic and international researchers who conduct frontier work on the broader field of macroeconomics to create research ties, encourage research collaborations and exchange feedback on cutting-edge macroeconomic research. We plan to schedule seven papers, allocating 50 minutes to each, which gives us ample time for presentation and discussion.

This workshop is co-organized by Pei-Ju Liao, Hsuan-Li Shane Su (National Taiwan University), and Donghoon Yoo (Academia Sinica).

This workshop is financially supported by the Taiwan Social Resilience Research Center of National Taiwan University (Grant no. 112L9003) and the NSTC Research Grant (Grant no. 112-2410-H-001-093).
